Nice HDPE C250 Channel with C250 Galvanised Brickslot Top

HDPE Channel with Galvanised Brickslot

The NICE slotted top channels were specially developed for integration of the drainage in high-quality natural stone and paving surfaces. The reduction to a discrete inlet slot enables decorative surface designs without compromise.

The steel shaft with smooth interior and exterior duplications enables a gapfree installation of the stones and easy cleaning of the inlets.

Innovative design for durable, safe function.

APPLICATIONS:

- C250 Loading
- Pedestrian precincts
- Kerbside drainage
- Slow moving light commercial vehicles

CHANNEL MATERIAL SPECIFICATION:

- n HDPE Channel
- n Galvanised Steel Slotted Top
- n Slot width 10mm

Product Code	Length(mm)	Internal Width(mm)	External Width	Total Height	Channel Height	Top Height	Slot Width
MH-DC-610166	1000	100	120	150	50	100mm	10mm
MH-DC-610169	1000	100	120	190	90	100mm	10mm

+ optimised self-cleaning with smooth-walled, downward-flaring shaft

+ rounded stabilisation bars

+ outward fold duplication for gap-free installation of the covering

+ variable surface design
