MH-GF-C-1212	400 x 400mm	345 x 345mm	45mm	4.01dm ²	SGS

Ductile cast iron GJS/500/7 - EN 1563 gully top produced, according to provisions of UNI EN 124 latest edition, by ISO 9001:2015 certified company, consisting of a square frame at both the supporting base and top corresponding to the street level, provided with: specific outer continuous winglet with round corners on all four sides, in order to supply a greater supporting bottom and a better anchoring to the foundation; holes for the grate's joint; preset internal winglets on the four corners to house a siphon. Square grate provided with : holes for the grate's joint; parallel slots placed on several rows; area on the side parallel to the hinge designed to house inscriptions; pair of nuts and bolts properly housed specific holes to allow the positioning of the grating in to the frame and prevent its theft and forcing; central concavity, where suitable, to carry out the minimum useful slope; anti-slipping patterns. All grates and frames must display the logo of a third-party certification body, EN124 code, loading class, producer's name, manufacturing place and casting lot (encoded). Equipment on demand: Siphon
